PROJECTS

E-COMMERCE WEBSITE

Main Tech Used : - React , Nodejs , Express , MongoDB

This project implements JWT token-based authentication. APIs for searching and filtering products, as well as APIs for the admin, have been developed. The admin has the ability to add, delete, and edit products and up, while users have the ability to login, search for products, apply filters, add items to their cart, and place orders. The frontend is designed to be responsive.

PERSONAL PORTFOLIO WEBSITE

Main Tech Used : - React , Nextjs , Nodejs , Typescript

This project is a personal portfolio website built using Next.js, React, and TypeScript. It features an animated navigation built with the Framer.js library and a highly animated design achieved through the use of the AOS library. The frontend is designed to be responsive, which makes it optimal for search engine optimization.

CRYPTO

Main Tech Used : - React , Nextjs , Nodejs

This project has been built with Next.js and offers the ability to check the prices of over 1000 cryptocurrencies. It provides graphical representation of these cryptocurrencies on an hourly, daily, weekly, and all-time basis. Additionally, the 24-hour volume and market capitalization of each cryptocurrency can be viewed.
